**DETAILED ACTION**

***Restriction Requirement***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 - 36, drawn to solid-state image sensor and X-Y architecture, classified in class 348, subclass 294 and 302.
- II. Claims 37- 78, drawn to noise or undesired signal reduction, classified in class 348, subclass 241.
- III. Claims 79-82, drawn to processing or camera details, classified in class 348, subclass 231.6.

Inventions I, II & III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the invention II has separate utility such as "adjustment means for adjusting centers of mass of light-receiving areas of said plurality of photoelectric conversion elements provided in a central portion of the image sensing apparatus" which is not included in the invention I. The invention III has separate utility such as "a lens system for forming an image on the image sensing apparatus; and a signal processing circuit for processing

an output signal from the image sensing apparatus" which is not included in the inventions I and

II. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

### *Conclusion*

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nhan T. Tran whose telephone number is (703) 605-4246. The examiner can normally be reached on Monday - Thursday, 8:00am - 6:00pm.
